Machine Learning Assignment 46  
Advertisement Sales Prediction Using Linear Regression  
#####
```

Q1. What is the mathematical equation of your trained Linear Regression model

$\text{sales} = 0.0447 \cdot \text{TV} + 0.1892 \cdot \text{radio} + 0.0028 \cdot \text{newspaper} + 2.9791$

Q2. What are the values of your model's coefficient (m) and intercept (c)?

Coefficients: TV = 0.0447, radio = 0.1892, newspaper = 0.0028
Intercept (c) = 2.9791

Q3. Display the values of R2 score, Mean Squared Error (MSE),
and Root Mean Squared Error (RMSE) for your model.

R2 score = 0.8994
MSE = 3.1741
RMSE = 1.7816

Q4. Predict the sales for TV=150, Radio=30, and Newspaper=25
and display the predicted value.

Predicted sales = 15.4334
